

DERMAL FILLERS

DERMAL FILLERS

Whether caused by sun exposure, your lifestyle or just the plain old passage of time, skin aging is a fact of life for everyone. Don't let each new wrinkle define your experience of life. Redefine the look of your skin with dermal filler that will restore your skin's lost volume.

Recapture Your Youthfulness with a Non Surgical Dermal Filler Treatment

If you are noticing the telltale signs of aging and are looking for an effective way to slow down their appearance, dermal fillers are a cost-effective solution for a visibly firmer, fresher and a more contoured appearance.

There are a variety of fillers available as it will depend on your particular needs. If you are concerned about fine lines forming deeper grooves or sagging skin affecting your appearance then this treatment can deliver results in minutes

Where do we use filler to make you look fresher? Below common areas we use fillers to enhance your look.

LIP FILLERS

Lip filler is a treatment designed to add volume to thin, line-formed lips, giving you fuller, sexier and fresher lips while still appearing natural. The filler is injected into specific areas of the lips to achieve fullness and volume that are more in proportion with the rest of a person's face.

We use the latest technique and dermal filler product to restore your lips. We promise to give you a balanced and natural looking result.

UNDER EYE DERMAL FILLERS

Wrinkles, upper eyelid bags and darker skin tone under the eye and around the eye area can make you look older than you are and tired even when you're not. If you notice small wrinkles, eye bags or just a darker skin tone under your eyes, you are not alone.

For those who suffer from dark circle or tear trough under the eyes, Eye Dermal Fillers are a quick and non surgical way to get rid of that eye bag, and dark circles. The under Eye Dermal Filler Treatment fills in the shadow caused by the sunken effects of the skin.

DERMAL CHEEK FILLERS

If the face staring back at you in the mirror is looking tired, it could be your cheeks are flattening and sagging. Cheek filler can instantly brighten and restore the natural and youthful contours of your face.

Cheek fillers replace the lost volume by restoring the volume and lifting your skin to create a younger looking appearance while maintaining your natural look.

BEFORE

AFTER

It is ideal for patients who are just beginning to lose volume around the cheek, and for men and women of all ages who suffer from minor aging signs.

NOSE FILLERS

Get the nose profile you've always wanted with our nonsurgical nose filler treatment. This treatment is designed to enhance the shape of your nose without the risks and downtime associated with plastic surgery.

Fillers can correct minor irregularities on your nose to make the overall profile appear more balanced, slimmer and symmetrical.

BEFORE

BEFORE

AFTER

A nose filler treatment involves using fillers strategically placed in the nose to smooth out bumps and create a look you are more comfortable with.

CHIN FILLERS

If you are unhappy with the appearance of your chin but would prefer not to pursue surgery, a chin filler treatment could be a viable option.

BEFORE

AFTER

Our non surgical Chin Filler Treatment is designed to help you overcome your concerns about your chin by allowing you to achieve an improved chin profile. Our chin filler treatment is an effective way to add length and definition to your face. Benefits of chin filler are instant correction, minimal discomfort and less cost than surgery.

WHY CHOOSE DR TEH FOR YOUR DERMAL FILLER TREATMENT?

Knowing that every patient is different, Dr Teh takes the time to understand the aesthetic contours of the face so you can look younger for longer. She will give you back the confidence you may have lost without looking overdone.

With over 20 years of cosmetic injection experience, you can be assured that you are in the hands of an experienced cosmetic doctor with an aesthetic eye for natural beauty. You will be surrounded by a team of friendly caring experts who want to help you look your best and enjoy the experience every step of the way. By choosing Dr Teh, you will walk out of the Dermedica's clinic with more confidence.

WHAT TYPE OF DERMAL FILLERS ARE BEING USED AT DERMEDICA?

There are a number of fillers available at Dermedica ranging from temporary to semi-permanent. At Dermedica, we use the latest generation and best dermal fillers to give you the safest and best outcome. The difference between the dermal fillers are their softness, viscosity and duration. We offer a wide range of different wrinkle fillers to treat various types and depths of wrinkles, folds and sagging skin on your face.

WHAT IS THE DIFFERENCE BETWEEN DERMAL FILLERS AND WRINKLE RELAXERS?

Both dermal fillers and anti-wrinkle injections treat wrinkles. However, they treat wrinkles differently. Dermal fillers are administered into the actual skin or under the skin to lift fine wrinkles and replace volume. A Wrinkle relaxer is a neuromodulator or muscle relaxant that is injected into the muscle to reduce muscle movement. The result is less wrinkling action on the skin. Wrinkle relaxers are commonly used to treat frown lines, crow's feet and forehead lines.

Due to TGA restrictions, we are not permitted to mention the specific name of the anti-wrinkle injection product we use at Dermedica. To find out the name, please contact our clinic.

ARE DERMAL FILLER TREATMENTS PAINFUL?

The treatment is quick, minimally invasive and is carried out using a local anaesthetic to ensure that you feel no pain. In most cases, you can carry on with your normal daily activities immediately after treatment with no downtime required.

ARE THERE ANY SIDE EFFECTS?

With Dr. Joanna Teh's experience and knowledge of facial anatomy, precautions are taken to avoid potential side effects. Rare side effects are temporary lumpiness, allergic reaction and infection. Minor side effects of bruising and swelling may occur. You can be assured that Dr Teh will take the utmost care to ensure your treatment and recovery is as pleasant as possible.
