

REFRESH MICRONEEDLING

MINIMAL DOWNTIME

COMFORTABLE TREATMENT

GREAT RESULTS

Let's Face It!

We want to look our best at any age – not over-filled and over-stretched, just natural. We want to age gracefully, beautifully and elegantly.

Inevitably, fine lines and wrinkles set in, and now there is a simple, non-surgical treatment that will address those concerns and have you out to dinner that same night.

Experience the collagen boosting ReFresh Microneedling treatment using 3 modalities synergistically working together to give you a superior natural results.

A perfect combination of:

- Micro needling
- Radio frequency energy
- LED

ReFresh Microneedling works by bypassing the epidermis and delivering powerful RF thermal energy directly to the dermis, resulting in tens of thousands of fractional coagulation zones and a natural wound healing process.

This promotes the synthesis of new collagen, elastin remodeling, and wound contraction, which rejuvenates laxity.

Because the thermal energy is delivered beneath the top layer of skin, there is a far lower risk of complications, as well as virtually no discomfort and downtime, compared to ablative and fractional lasers.

BEFORE AND AFTER RESULTS

*Individual results vary

FREQUENTLY ASKED QUESTIONS

Benefits of ReFresh Microneedling:

Reduce fine lines and wrinkles, Skin tightening, Scar revision, Reduce spider veins, Improve stretch marks, Minimise Pore size, Improve skin texture and tone and Even skin tone

What does ReFresh Microneedling feel like?

At Dermedica we can apply numbing cream to your face to increase comfort level. You will experience a light pressure to the face.

What is RF?

Radio frequency provides heat that stimulates collagen production, when combined with state-of-the-art Microneedling, patients have experienced optimal results for overall skin tightening, fine lines and wrinkles, improvement in scars, spider veins, stretch marks, pore reduction and improved skin tone and texture.

How many treatments do I need?

Depending on the type of your skin the treatment may require about three treatments, spaced four to six weeks apart. Results can take up to three months to fully appear as the process of collagen regeneration increases over time.

How long does it take?

The actual treatment takes about 45 minutes, with an additional 30 to 45 minutes needed for numbing.

How long does the result last?

Everyone is different, but the collagen you make is your own and production of collagen continues over the next three months. Results will improve over time
